PROFESSIONAL SUMMARY

Senior Frontend Engineer with 6+ years of experience building scalable SaaS and enterprise web applications with React, Next.js, Vue.js, TypeScript and JavaScript. Experienced in frontend architecture, performance optimization, design systems, testing, GraphQL/REST APIs, CI/CD and cloud infrastructure. Delivered measurable improvements across applications serving ~20K monthly active users and ~100M requests/month, including Lighthouse performance improvements from ~60 to ~90, Core Web Vitals optimization, JavaScript-to-TypeScript migrations, reusable component systems, production incident resolution and engineering productivity improvements.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

Frontend: React, Next.js, Vue.js, Vuex, Tailwind CSS, Responsive Design, Component Libraries

APIs & Data: GraphQL, REST APIs, API Integration, Caching, Request Deduplication

Testing & Quality: Jest, Playwright, Cypress, Storybook, Unit Testing, End-to-End Testing

Architecture & Performance: Frontend Architecture, Performance Optimization, Core Web Vitals, Lighthouse, Codebase Modernization

Cloud & DevOps: Docker, Kubernetes, Google Cloud, Cloudflare, CI/CD

Monitoring: Grafana, Sentry, Production Monitoring, Incident Resolution

Engineering Tools: Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Webpack

AI & Development: Generative AI, AI-assisted Development, AI Workflows, AI Skills, SDLC Automation

Ways of Working: Agile, Scrum, Cross-functional Collaboration, Code Review, Technical Mentoring

PROFESSIONAL EXPERIENCE

EVOPLAY

Frontend Developer · Senior-level Frontend Engineering Responsibilities

Feb 2021 – Present | Kyiv, Ukraine

- **Led frontend development and architecture** for large-scale web applications serving **~20K monthly active users**, using **Vue.js, TypeScript, GraphQL and REST APIs** and modern frontend engineering practices.
- **Designed frontend architecture** and contributed to architecture decisions across **dozens of frontend services**, supporting a distributed engineering organization of **~50 developers**.
- **Built reusable UI components and a component library** adopted by **~50 applications**, improving consistency, maintainability and development efficiency across products.
- **Improved Lighthouse Performance** scores from **~60 to ~90** through frontend performance optimization and application-level improvements.

Dmytro Rudniev | Senior Frontend Engineer

- **Improved Core Web Vitals**, reducing **LCP from ~5.5s to ~3s**, maintaining **CLS below 0.05** and achieving FCP of approximately **2s**.
- **Reduced page load time** by less than one second through frontend optimization, asset and rendering improvements.
- **Increased Jest unit test coverage** from **~0% to ~40%** and strengthened automated quality practices with **Jest, Cypress and end-to-end testing**.
- **Migrated ~20 legacy JavaScript modules to TypeScript**, improving type safety, maintainability and codebase modernization.
- **Optimized GraphQL queries** and reduced transferred payload by **~10%**; reduced redundant API requests through caching and request deduplication.
- **Reviewed ~200 pull requests**, provided technical guidance and **mentored 2 engineers** while contributing to frontend engineering standards.
- **Collaborated with ~150 engineers** across frontend, backend, QA and DevOps, working in Agile teams across **3 time zones**.
- **Worked with Docker, Kubernetes, Google Cloud, Cloudflare and CI/CD** to support reliable development, deployment and production operations.
- **Contributed to CI/CD improvements**, reducing pipeline execution time and improving engineering delivery workflows.
- **Resolved ~10 production incidents** and improved observability and monitoring using **Grafana and Sentry**.
- **Delivered ~50 production releases/year** and integrated **~10 third-party services and APIs**.
- **Built internal tooling, reusable libraries and AI-assisted development workflows** that saved approximately **20 engineering hours/month**.
- **Supported applications handling ~100M requests/month** and contributed to reliability, scalability and performance improvements.

LIGA:ZAKON
Frontend Developer
May 2019 – Feb 2021 | Kyiv, Ukraine

- **Delivered 200+ responsive landing pages and marketing websites** with a focus on frontend quality, responsive design and maintainable implementation.
- **Developed WordPress solutions** using **PHP, Advanced Custom Fields (ACF) and Elementor**.
- **Implemented SEO improvements and analytics integrations** to support search visibility, measurement and marketing performance.

EDUCATION

Igor Sikorsky Kyiv Polytechnic Institute (KPI)
Master’s Degree in Electric Power Engineering | 2015–2020
